Fund Manager Comment

Market environment

MENA equities, represented by the S&P Pan Arab Composite Large Midcap index lost 2.01% in the reporting month. Relative to global markets, Mena Equities outperformed the MSCI World by 2.26%. Global equities retreated further in September as rising long term yields rallied as hard economic data supported higher growth. Commodity complex represented by the Bloomberg Commodity Index was marginally down 0.13% supported by surging energy prices especial crude oil. Brent crude oil price gained 9.85%.

Portfolio performance

The fund outperformed its benchmark during the month, attributed primarily by selection effect. Saudi Arabia and UAE markets were the biggest contributors to relative performance. From a sectoral perspective, the biggest contributors to relative performance were Real Estate, Financial, Information Technology, and Energy while Healthcare and Communication Services were the biggest drag to relative performance.

Outlook

Mena markets relative performance to global markets pulled back from intermediate high in mid-2022. We anticipate that the pullback will make a higher lower and reverse back to the upward trajectory established. Commodity prices to benefit from the recovery of the global economy following structural changes in supply in the previous decade. Valuations remain undemanding while earnings growth expected at higher single digit.
